Next Meetings: March 3rd, 2016 5:30 pm

1. Warrenstreet personnel did a walk-around of the Town Hall property to get an initial impression of the area to be proposed by the committee for evaluation as a possible site for a future Police Station.
2. Discussions were held about considering a master plan for the town owned property to take future growth potential into consideration per the charter established for the Police Facilities Committee by the Board of Selectmen.
3. Warrenstreet presented a design of a police station that was originally presented for the Hampstead Police Department. Although it wasn't the design that was eventually used, it served as an example of what it could look like. The design was reviewed by Chief Carpenter and the committee and an active discussion was held referencing workflow and modifications that could be made to reduce the cost of a similar structure for our specific needs.
4. Further discussions were held preparing a formal presentation to provide the Board of Selectmen and public with the findings of this committee.
