

# TOWN OF NEW IPSWICH

## BUILDING PERMIT FEE SCHEDULE EFFECTIVE: February 7, 2022

### **Building Permits**

The Building Official has the right to adjust inaccurate estimates and charge additional fees where applicable. The Building Official also reserves the right to contract with third party engineers for plan review; the costs will be borne by the applicant. (Structural and Life Safety Reviews)

Note: Any person, owner, firm, or corporation who: erects, constructs, alters, reconstructs, repairs, remodels, removes, or demolishes any structure, building component, mechanical system, or equipment regulated by this fee schedule before obtaining a permit from the building department will result in permit fees being doubled and paid prior to the commencement of work again. Violations are \$100/Day until resolved or an agreement is reached with the Board of Selectmen and Building Inspector. (Permits valid 1 Year)

Repairs (R105.2.2) Application or notice to the building official is not required for ordinary repairs to structures, replacement of lamps or the connection of approved portable electrical equipment to approved permanently installed receptacles. Such repairs shall not include the cutting away of any wall, partition or portion thereof, the removal or cutting of any structural beam or load-bearing support, or the removal or change of any required means of egress, or rearrangement of parts of a structure affecting the egress requirements; nor shall ordinary repairs include addition to, alteration of, replacement or relocation of any water supply, sewer, drainage, drain leader, gas, soil, waste, vent or similar piping, electric wiring or mechanical or other work effecting public health or general safety.

Note: There is a variety of ordinary repair, replacement or connection work that is exempt from the permit application process. This section (105) identifies a number of general situations in which a permit is not required. The provisions then state the types of repairs for which a permit is required. Repair work done without a permit must still comply with the applicable provisions of the code.

Calculation for Residential Building Permits: The Town of New Ipswich utilizes the square-footage method for calculating the permit cost for single and two-family dwellings. The living area will be calculated at \$0.30 per square-foot. Basements, garages, decks, and porches will be figured at \$0.20 per square-foot. All finished basements in new single and two-family dwellings must be clearly marked on the permit application and will be calculated at \$0.25 per square-foot. Failure to indicate finished basement will result in additional fees.

**Residential and Commercial Construction**

Minimum Permit Fee (Including Finishing Basements)	\$50.00
New Construction – Single and Two Family Homes (Including Mobile Homes, Modular Homes)	\$0.30/square-foot
